

10 Reasons to convert to LED Lighting

1. Energy conscious – reduces electrical costs by 80%.
2. A healthy choice both for your health and the environment.
3. Can be used for both OUTDOOR and INDOOR applications.
4. Produces less heat, less burnt fingers and fewer fire hazards.
5. More light colour choices available in LED lighting – eg. cool white, warm white as well as many colours.
6. Bulbs are solid and more durable.
7. LED lighting will not flicker.
8. LED lighting is instant at its full brightness.
9. Most LED lights are dimmable.
10. Lasts up to 50,000 hours or 25 years.

Did you know?

LEDs work well indoors and outdoors because of their durability and performance in cold environments.
